

ATX to Lacerte Converted Items

The main purpose of this conversion is to get your data ready for the following tax year. Therefore, viewing a Form 1040 or business equivalent form will not display the same results that had been filed. Some of the data is also placed in input fields that appear to be incorrect but are used as place holders. When the return has been transferred to the following year, these amounts will go to the correct input fields.

For the Individual program, additional data will be converted to help fill out an organizer. Information such as wages on a W2 are converted to help fill out the prior year amounts for an organizer. This will result in Form 1040 looking similar but not identical to what was filed during the tax year. Again, viewing a Form 1040 will not display the same results that were filed with your other program.

Items to Note

- **Number of Assets** - The conversion program converts a maximum of 2500 assets.
