

QuickBooks Payroll for Hospitality

QuickBooks Payroll powered by Employment Hero allows hospitality businesses to seamlessly manage employee timesheets, onboarding, rostering and award rates, all the way to the pay run - in one system. Paying employees and staying compliant becomes the easiest part of your job.

Let employees serve themselves

Accepting, declining and swapping shifts, clocking on and off, requesting leave and viewing payslips can now all be done by your team, from their mobiles. Empower your employees to manage their own data via the WorkZone mobile app and never receive a request for a payslip again!

Effortless rostering and wage overviews

Our ease to use rostering tool caters for even the most complex scenarios. Set your roster based on employee cost, qualification, staff availability or location. No more frantic scrambling. Staff can easily access rosters and manage shifts, and you'll be able to see projected wage costs at any time.

ATO and STP compliance made easy

We've streamlined compliance to save you time and paperwork. Single Touch Payroll is inbuilt, ATO approved and ready to go.

Employee onboarding in minutes

Say goodbye to the paperwork associated with hiring new employees. A process that traditionally take weeks of back and forth can now be over in minutes! With employee self set up, employers can send a digital form to new joiners and let them enter their own personal information to instantly onboard themselves. The data will then automatically be lodged to the ATO - no more paper TFN forms. No more chasing.

Zero-touch award interpretation

Interpreting and implementing the General Retail Award can be confusing. Our prebuilt awards system does it for you. Simply select General Retail Award from our extensive list of modern awards, click install and you're 100% compliant with Fair Work.

Detailed attendance tracking

Every business is different so we've created a flexible time and attendance platform that works the way you do. Our Clock Me In app allows employees to easily clock in and out at a fixed site, generating timesheets for staff and doing all the shift calculations for the payroll manager. No more paper timesheets, spreadsheets or uploading of data.

* In 2021, the Employment Hero payroll software had the highest market share of any other payroll software for SMBs with less than 50 employees. Source: Australian Payroll Association's 2021 Payroll Benchmarking Report.

"Your payroll system has saved time and given us much more visibility of our costs. It's really intuitive and makes things a lot easier."
