Lesson 10

Inventory

Contents

Lesson objectives	3
Why track inventory in QuickBooks?	3
Turn on inventory	5
Set up inventory parts	6
QuickBooks bundles	10
Purchase orders	12

In this lesson, you'll learn how QuickBooks handles inventory. You can use QuickBooks to track the items you keep in inventory and sell to your customers. If your business purchases or makes items for resale, keeps them in inventory, and then sells them, QuickBooks can track quantities on hand and the value of your inventory after every purchase and sale.

Lesson objectives

In this lesson, you'll learn how to:

- Enable and setup inventory
- Order and receive inventory using purchase orders
- Sell inventory
- Adjust inventory
- Create inventory reports

Why track inventory in QuickBooks?

There are several reasons to track inventory in QuickBooks.

- When you use purchase orders to buy inventory items, QuickBooks updates your inventory, so you know which items are on order and when they're due to be received
- You can easily keep track of the cost to you of the items you have sold (the cost of goods sold)
- You can easily keep track of the income you receive from the sale of inventory items
- You always know your current quantities on hand
- You always know the current value of your inventory

NOTE Inventory in QuickBooks Online is only available in QuickBooks Online Plus.

How QuickBooks Online tracks and costs inventory

QuickBooks Online uses the first in, first out method to cost inventory.

As prices go up and down, you might purchase items for a different price than you'd previously paid for units of the same type. When you have items in inventory that are of the same kind but were bought at different prices, it raises a question: For each item you sell, which purchase price applies to that item?

QuickBooks Online uses the FIFO method to answer this question. As the name implies, QuickBooks Online will always consider the first units **purchased** (first in) to be the first units **sold**

(first out) and will adjust your assets and Cost of Goods Sold (COGS) accordingly whenever sales of inventory items are entered.

An example will make this clearer:

Let's suppose you decide to begin selling a product called a "widget." You purchase 20 widgets for \$6 apiece. While they remain in inventory, the widgets are considered assets and are valued at cost. (Since you haven't sold any widgets yet, your COGS for widgets is \$0.)

Current Inventory:	20 units at \$6 each
Total Widget Assets:	\$120
Total Widget COGS:	\$0

You schedule meetings with some of your customers. They show great interest in widgets, and you realize you don't have enough. You order 30 more widgets, but since your last purchase the price from your wholesaler has gone up to \$7 apiece. When you record the purchase, QBO adds \$210 to your assets.

Current Inventory:	20 units at \$6 each; 30 units at \$7 each
Total Widget Assets:	\$330
Total Widget COGS:	\$0

You meet with the first customer, and she purchases 15 widgets. Because the \$6 units entered your inventory before the \$7 units, QBO applies the FIFO rule and values all 15 units in this order at \$6 apiece. When you record the sale, the asset total for widgets is decreased by \$90, and the COGS for widgets is increased by \$90.

Current Inventory:	5 units at \$6 each; 30 units at \$7 each
Total Widget Assets:	\$240
Total Widget COGS:	\$90

You meet with another customer, and he purchases 20 widgets. When you record the sale, QuickBooks Online applies the FIFO rule, and adds the \$6 units first. Since only five of those units remain in inventory, the other 15 units for this order are valued at \$7 apiece. Your widget assets are reduced by \$135 ($5 \times 6 + 15 \times 7$), and your COGS is increased by \$135.

Current Inventory:	15 units at \$7 each
Total Widget Assets:	\$105
Total Widget COGS:	\$225

As you can see, if you then sell more widgets from your current inventory to a third customer, they will all be valued at \$7 apiece.

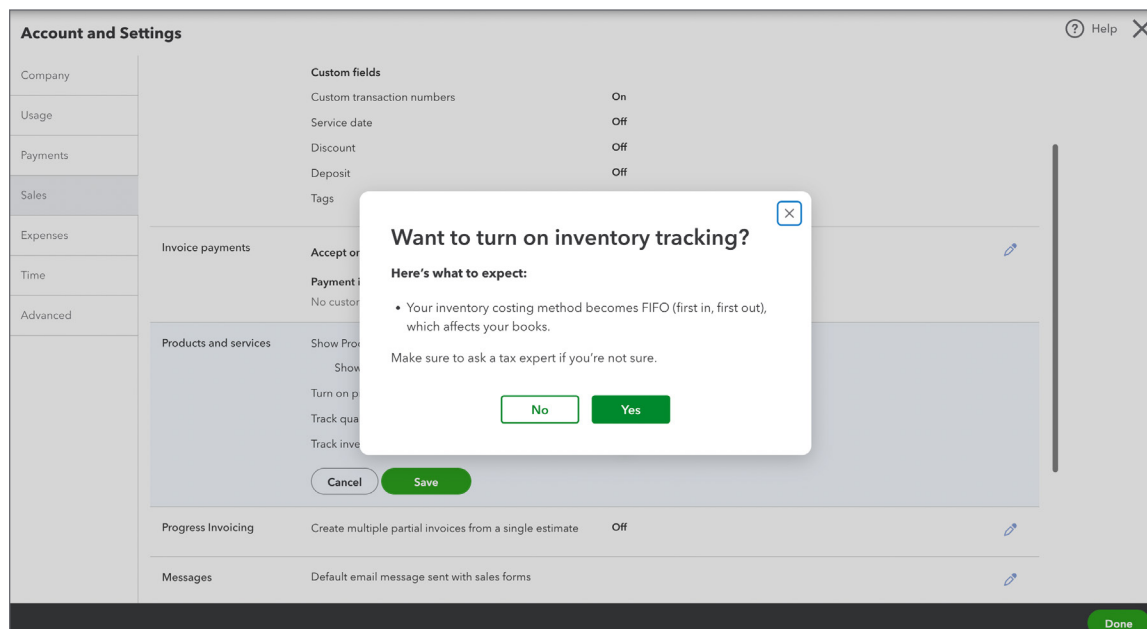

Cost of goods sold account

Cost of Goods Sold is an account that reflects the cost of materials and goods held in inventory and then sold. When you sell an item from your inventory, Cost of Goods Sold increases by the amount you paid for that item when you purchased it. The difference between the income from the sale and the increase in Cost of Goods Sold is the gross profit on the sale of that item.

▶ Turn on inventory

To use inventory, you must enable to feature in QuickBooks Online Plus.

1. Click the **Gear** menu.
2. Click **Account and settings**.
3. Click **Sales**.
4. Click **Products and services**.
5. Select **Track inventory and quantity on hand**.
6. Click **Save**.
7. Click **Done**.

NOTE

- The **Show product/service columns on sales forms** is enabled by default. It is the column you choose on the sales form to add a product or service to a sales form.
- Select **Show SKU column** if you want to display the SKU number on forms. This feature adds a SKU column to on-screen sales forms so you can easily track products and services by SKU. You can also show SKUs on printed forms.
- The **Track quantity and price/rate** field is enabled by default and adds the fields to sales forms.

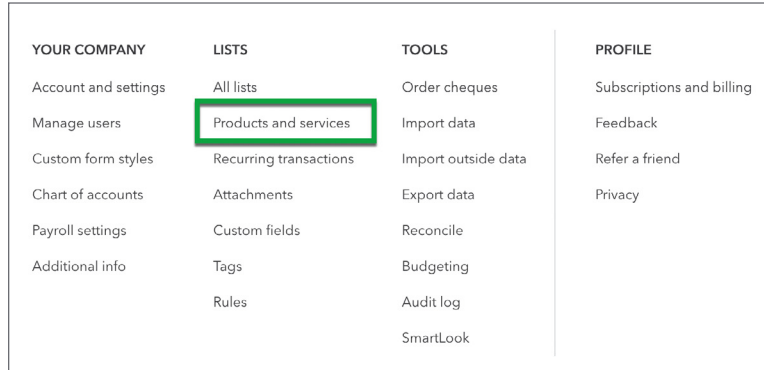

To learn how to enable inventory watch this video: <https://youtu.be/ipPGUxtKW2I>

▶ Set up inventory parts

You can set up inventory parts from the Products and services list.

1. Click the **Gear menu > Products and services**.

2. Click **New**.

Products and Services More ▾ New ▾

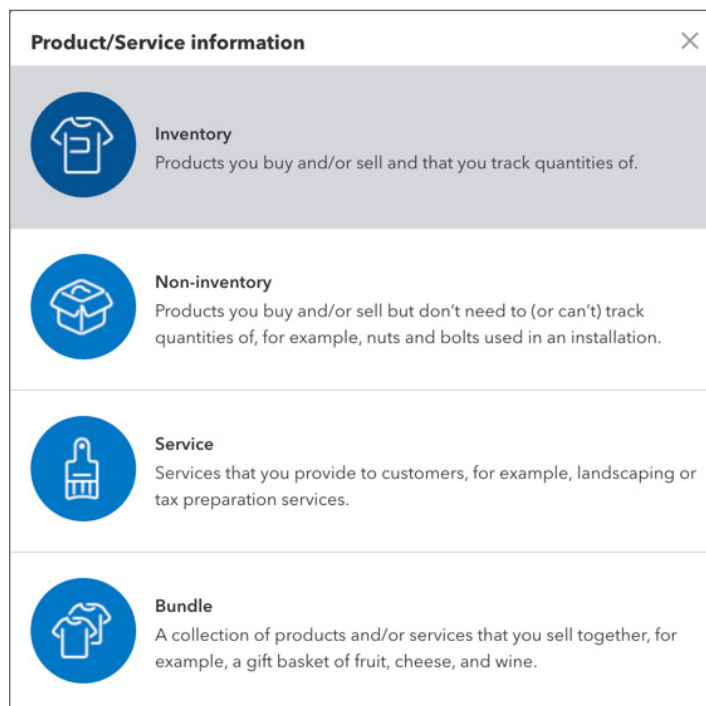

LOW STOCK **OUT OF STOCK**

Find products and services Filter

<input type="checkbox"/>	NAME ▲	SKU	TYPE	SALES DESCRIPT	SALES PRICE	COST	QTY ON HAND	REORDER POINT	ACTION

<input type="checkbox"/>	Weekly Lawn Maintenance		Service	Weekly lawn ...	48.50				Edit ▾

Previous 1-2 Next

3. Click **Inventory**.

4. Enter the name of the item.
5. (Optional) If you want to track the item's **SKU**, enter it.
6. (Optional) Upload a picture of the item.
 - a. Click the image box.
 - b. Find the image you want to upload.
 - c. Click **Open**.
7. (Optional) If you want to track the item by category, click the drop-down arrow and select a category, or select **Add new** to create a new one.

NOTE A category is a means of classifying the products you sell to customers.

8. In **Initial quantity on hand**, enter how many of this item you have. If you don't have any yet, enter 0.
9. In **As of date**, enter the date you want QuickBooks to start tracking this item's quantity on hand.

NOTE Choose the As of date carefully. You can use this item only in transactions that come after this date.

10. (Optional) In **Reorder point**, enter the minimum quantity you want to have on hand. This will remind you to reorder more products at this minimum threshold.
11. If necessary, click the **Inventory asset account** drop-down arrow and select a different asset account. QuickBooks chooses the default asset account, but you can choose an account you'd like to use to track the inventory value.
12. (Optional) Enter the **Description** that customers see on sales forms.
13. (Optional) Enter the **Sales price** or rate for this item. If the sales price or rate varies, you can leave this field blank.
14. If necessary, click the **Income account** drop-down arrow and select a different income account. Choose the account you want to use to track the sales of this product.

15. If you charge sales tax when you sell this item, select **Is taxable**. This means that every time this item is sold, QuickBooks will add sales tax to the sales form. This helps automate sales tax tracking in QuickBooks.

16. (Optional) Enter the description in **Purchasing Information** that appears on purchase forms, like purchase orders and bills, when you order or receive this item.
17. (Optional) Enter the **Cost** of this item.
18. In the Expense account menu, choose a **Cost of Goods Sold** account. QuickBooks presets the account to the **Costs of Goods Sold** account.
19. Choose the **Purchase tax code** that is used when you purchase the inventory item.
20. You can assign a preferred supplier to specific inventory items to save time when reordering those items and also create a purchase order using the preferred supplier you assigned. Choose the supplier from the **Preferred supplier** menu.
21. Click **Save**.

 To learn how to create an inventory item watch this video: <https://youtu.be/Me4KvTEeogQ>

QuickBooks bundles

A bundle is simply a way of grouping products and services that you often sell together. Bundles save time when you create sales transactions. Instead of entering each product or service as a separate line item, you just enter the bundle itself, and QuickBooks automatically adds the bundled items to the transaction for you.

Example—You sell a gift basket that contains a bag of candy, seasonal fruit, and a bottle of wine. You usually add the candy, fruit, wine, and the basket as separate line items on sales forms. Instead, save time by creating a bundle called “Gift Basket” that includes all 4 items. When you’re ready to record a sale, just add the bundle to the sales form, and QuickBooks adds the 4 bundled items to the form automatically.

To create a bundle:

1. Click the **Gear menu > Products and services**.
2. Click **New**.
3. Click **Bundle**.
4. Enter a name for the bundle.
5. (Optional) To track the bundle by SKU, enter it.
6. (Optional) Add an image to the bundle.
 - a. Click the edit icon.
 - b. Find the image.

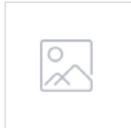

c. Click **Open**.

Product/Service information ×

	PRODUCT/SERVICE	QTY	
⋮	 Rototiller Supreme 5000 Rototiller Supreme 5000	1	🗑️
⋮	 Wheelbarrow Wheelbarrow	1	🗑️
⋮			🗑️

Save and close ▼

7. (Optional) Enter the description that customers see on sales forms.
8. If you want to show your customers the individual items that the bundle contains, select **Display bundle components when printing or sending transactions**. Otherwise, your customers see the name of the bundle but not the items in it.
9. Enter the products and services you want to include in the bundle. Change the quantity for each product or service as needed.
10. Click **Save and new** to create another bundle, or click **Save and close** if you're done.

NOTE A bundle can contain up to 50 products and services. However, a bundle can't contain another bundle.

▶ Purchase orders

A purchase order (PO) is a document you can send to a supplier. It states your intent to purchase products or services from them and defines the details of the purchase, such as quantities and prices. If the vendor/supplier accepts your PO, it means you have an agreement with them to receive those products or services under the terms given. It's a good idea to use purchase orders to order and receive inventory items.

Enabling Purchase Orders

Purchase orders are available in QuickBooks Online Plus. Purchase orders aren't available in QuickBooks Online Essentials or Simple Start.

To enable Purchase orders:

1. Choose **Gear menu > Account and settings**.
2. In the left sidebar, click **Expenses**.
3. To the right, click on the pencil next to **Purchase orders**.
4. Select the **Use Purchase orders** box.

Total for Gary's Garden Wholesale				\$2,170.73	\$2,170.73
TOTAL				\$18,624.23	\$10,749.23

NOTE This report provides you with all open purchase orders listed by supplier.

You can also view open purchase orders on the **Suppliers** page. Click **Suppliers** and then click **Purchase orders** in the colored bar at the top of the window.

The screenshot displays the 'Suppliers' page in QuickBooks. At the top, there are tabs for 'Expenses', 'Bills', 'Suppliers', and 'Mileage'. The 'Suppliers' tab is active. A summary bar shows four categories: 'Unbilled Last 365 Days' with a value of \$11,300.00 and 1 purchase order; 'Unpaid Last 365 Days' with 0 and 0 overdue; 'Open Bills' with 0 and 0 open bills; and 'Paid' with \$686.59 and 1 paid last 30 days. Below this is a search bar and a table of suppliers. The table has columns for 'SUPPLIER', 'COMPANY NAME', 'PHONE', 'EMAIL', 'OPEN BALANCE', and 'ACTION'. Two suppliers are listed: 'Canadian Tire' and 'Receiver General', both with an open balance of \$0.00 and a 'Create bill' action.

Receive against purchase orders

After a supplier has fulfilled the product or service for your purchase order, you'll need to record a bill, a check, or expense (a credit card charge or cash transaction showing what you paid) to the supplier.

When you select a supplier for any of these transaction types, a **Purchase orders** section displays on the right-hand side of the screen. To add a PO to the transaction, click **Add** on the purchase order displayed. The PO will be added on the first available line in the Itemize by Product/Service section below. If you don't see the PO you need, check the date of the bill, check, or expense you're linking it to. You can only link to a transaction that is dated on or after the PO date.

1. Click the **+ New** menu.
2. Click **Bill**.

3. Click **Add** on the purchase order displayed on the right side of the window. If you update the amount received QuickBooks will enter that amount into the quantity on hand.

Physical inventory worksheet

This report displays the **Name**, **Description**, and **Quantity on hand**, **Reorder point**, and **Physical count** of each item in your inventory. The Physical count column includes blank lines where you can write in the actual quantities as you make a physical count of your inventory.

Green Tree Landscapes					
PHYSICAL INVENTORY WORKSHEET					
PRODUCT	DESCRIPTION	QTY ON HAND	REORDER POINT	QTY ON PO	PHYSICAL COUNT
Lawn & Garden:Garden Hand...	Garden Hand Trowel	9.00		10.00	
Lawn & Garden:Garden Shovel	Garden Shovel	24.00		0.00	
Lawn & Garden:Wheelbarrow	6.0 Cubic ft. Wheelbarrow, Ea...	38.00		0.00	

Adjusting inventory

Sometimes you might discover that you have a different count of an inventory item than QuickBooks displays. If that happens, you can easily adjust that item's quantity in QuickBooks to match what you have in stock.

To adjust multiple inventory items, do the following:

1. If you have a lot of inventory items to adjust:
 - a. Click the **Gear menu > Products and services**.

Products and Services									
Find products and services									
<input type="checkbox"/>	NAME ▲	SKU	TYPE	SALES DESCRIPTI	SALES PRICE	COST	QTY ON HAND	REORDER POINT	ACTION
<input type="checkbox"/>	Gardener Starter Kit		Bundle	Gardener Sta...					Edit ▼
<input type="checkbox"/>	Hours		Service						Edit ▼
<input type="checkbox"/>	Landscaping Work		Service	Landscaping ...					Edit ▼
Lawn & Garden									
<input checked="" type="checkbox"/>	Garden Hand Trowel	40902	Inventory	Garden Hand...	27.95	13.459	9		Edit ▼
<input checked="" type="checkbox"/>	Garden Shovel	3489309	Inventory	Garden Shovel	39.95		24		Edit ▼
<input checked="" type="checkbox"/>	Wheelbarrow	3897484	Inventory	6.0 Cubic ft. ...	99.95	33.877	38		Edit ▼

- b. Select the inventory items you want to adjust.
 - c. Click the **Batch actions** drop-down arrow and select **Adjust quantity**.

Otherwise, click **+ New > Inventory qty adjustment**.
2. If necessary, edit the adjustment date.

- If necessary, click the **Inventory adjustment account** drop-down arrow and choose a different account. QuickBooks uses a preset account.

Memo

Cancel Clear Save Save and close

- If the table is empty, add the inventory items you want to adjust:
 - In the first row in the table, click the **Product** field.
 - Click the drop-down arrow and select an inventory item.
 - Repeat steps a and b to add other inventory items as needed.
- For each inventory item in the table, enter either a new quantity or a change in quantity.

For example, the **Qty on hand** column shows that you have 10 widgets, but you discover that 2 widgets are missing. You can adjust the quantity either by entering 8 in the **New qty** column or by entering -2 (negative 2) in the **Change in qty** column.

- Enter a reminder in the **Memo** field about why you made this adjustment (optional).
- Click **Save**.
