

# Items to note:

## Prosystem FX to ProSeries

---

This list provides details about how ProSeries converts the following 1040 calculated carryovers.

**Preparer Number** - The preparer number has been converted from ProSystem FX. Therefore, preparer names should be set up with the same number in ProSeries.

**Number of Assets** - The conversion program converts a maximum of 2500 assets.

**Date of Birth** - Verify date of birth in Client Information and Dependents, and adjust if necessary.

**Note:** The installment sale section has a category for State Prior year installment sales - Gross Profit Ratio and Ordinary Income. Enter state amounts only if the state amounts are different than federal.

**Depreciation** - In the 2023 program, AMT prior depreciation should be reduced by Section 179 and any special depreciation. State depreciation entries should be reviewed and adjusted as necessary. Depreciation amounts will also be re-calculated by the ProSeries program. It is possible that depreciation amounts may be a few dollars different due to rounding/calculation method differences.

**Vehicles** - ProSeries converts only the first two vehicles entered per entity to ProSeries from ProSystem FX Sheet A-10.

**Parent's Election to Report Child's Income** - ProSeries converts the child's name and social security number to ProSeries only if they are entered on ProSystem FX Sheet T-11.

**General Business and Passive Activity Credits** - The Form and Prefix Number cannot be converted.

**Note:** We also recommend that you review and update the following items after your conversion:

Carryovers, such as credit carryovers and NOLs

State information, including multi-state depreciation

Any hurricane-related issues that overlap years, such as pension withdrawals

Foreign tax credit carryovers
